Hello there, I am Volkan! I am 19 years old, a first year computer engineering student and a web developer. I have been involved in web development for over 1 year. Also, music has always been my companion. I am a professional pianist as well. I would like to change the future and shape it for the benefit of the people by using my past experiences. My ultimate goal is to be a beneficial individual to society and to ensure that people are. I want to work with determination so that my engineering knowledge and skills will be useful to our society. The projects that I will take advantage of my creativity will always be directed towards a better world.

Work experience

volkanalkan.com - Founder   Sep 2020 - Present
Izmir / Turkey

The main purpose of this project is to get closer to one of my goals, the plan of establishing a virtual company, to show myself by establishing a personal website.

Google Developer Students Club - Core Member   Sep 2020 - Present
Google DSC Bau, Istanbul / Turkey

Developer Student Club Leads are passionate volunteer leaders at their university who are dedicated to helping their peers learn and connect. These Leads may be pursuing various degrees but have a good foundational knowledge of software development concepts. Google collaborates with DSC Leads once a year who are pursuing an undergraduate or graduate university degree and supports them as they start and grow their on-campus community.

AIS Turkey - Board Member   Oct 2019 - Jul 2020
Istanbul / Turkey

AIS is an artificiel intelligence society founded by students at Bahçeşehir University. After a while, the community grow all around the Turkey under the name of "AIS Turkey". Our goal was to ensure the development of artificial intelligence for the whole of Turkey. Besides the board of directors, I also worked as a web developer.

EKOBOT   2017
Izmir / Turkey

This Project was awarded the first prize in the robot contest with the theme "I Think Robotics" organized by the University of Bahcesehir and the french high school of Saint Benoit. Under the name of social responsibility project, we designed an automatic environmental robot.
